USE OF HUMAN OR ANIMAL
SUBJECTS IN RESEARCH

Any systematic investigation involving human participants which is
designed to develop or contribute to generalizable knowledge must be
reviewed and approved by the IRB (Institutional Review Board) for the
Protection of Human Subjects in Research. Any use of vertebrate animals
for either research or instructional purposes must be reviewed and
approved by the IACUC (Institutional Animal Care and Use Committee)
prior to initiation. This includes investigations conducted by faculty,
students, staff or others on the premises of the University of Nebraska
at Kearney as well as investigations conducted elsewhere by any
representative of the University of Nebraska. This policy applies to both
funded and non-funded research projects. For additional information,
copies of the guidelines which govern committee decisions, and forms
for filing requests for review, contact either Dr. Sharon Obasi, IRB Director,
Warner Hall 2200, Dr. Joan Blauwkamp, Chair, IRB, COPH 220D, or Dr.
Dustin Ranglack, Chair, IACUC, Bruner Hall 343.
