<tr>
<td>PSY 270 – Research Methods II</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Techniques for designing a specific research project are presented. Students conduct the proposed study and present their findings in an APA style research paper. Prerequisite: PSY 250 and PSY 270.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PSY 280H – Special Topics</td>
<td>1-3</td>
<td></td>
</tr>
<tr>
<td>An interdisciplinary General Studies course for Honors students that examines the connections between disciplines. Total Credits Allowed: 3.00</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PSY 300 – Orientation to Psychology</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>An informal review of academic, professional, and career planning issues of a psychology major. Prerequisite: PSY 203 and declared major in Psychology.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PSY 310 – Learning and Conditioning</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>The concepts and principles of learning are studied in detail. Data from human and animal experimentation are considered. Prior completion of PSY 270 is recommended. Prerequisite: PSY 203.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PSY 312 – Sensation and Perception</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Sensory and perceptual systems are examined in detail. Prior completion of PSY 270 is recommended. Prerequisite: PSY 203.</td>
<td></td>
<td></td>

</table>
PSY 372 – Cross-Cultural Psychology  3 credit hours
Examines psychological processes related to perception, cognition, human development, psychopathology, gender influences and social behavior from a cross-cultural perspective. Current theories, methods and research findings are discussed. Prior completion of PSY 270 is recommended.  
Prerequisite: PSY 203

PSY 374 – Psychology of Gender  3 credit hours
Motivational levels, goals, self-concept, and various personality characteristics which differentiate between women and men are studied. Rearing differences between boys and girls and their accompanying behavioral expectations are studied as well as the development of sex differences in intellectual and biological functions.

PSY 376 – Psychology and Criminal Behavior  3 credit hours
Criminal behavior and rehabilitative efforts will be investigated in light of psychological research, theory and clinical experience. Various potential causes of criminal behavior will be explored. Psychology’s role within the legal system will also be addressed.
Prerequisite: PSY 203

PSY 388 – GS Capstone  3 credit hours
An interdisciplinary experience where students apply the knowledge, cognitive abilities, and communication skills they have gained from General Studies in designing and completing an original project or paper. Students employ methods and interpretive means of two or more disciplines to integrate knowledge and synthesize their results. Satisfies the General Studies capstone course requirement. Students may take their Capstone course in any discipline.
Prerequisite: Junior or senior level standing or within 6 hours of completing general studies requirements.

PSY 388L – GS Capstone Lab  1 credit hour

PSY 399 – Psychology Apprenticeship Programs  1-3 credit hours
Students assist faculty members as research assistants, as classroom discussion leaders, as proctors in PSI courses, or in preparing special lectures or programs. Departmental permission required. PSI proctoring is recommended for those students preparing to take the Graduate Record Exam.
Total Credits Allowed: 12.00
Prerequisite: PSY 203

PSY 400 – Advanced Research Design and Analysis in Psychology  3 credit hours
Advanced multivariate statistical techniques are explored, including Multiple Regression, Canonical Correlation, MANOVA, Discriminant Function Analysis, and Factor Analysis. Special emphasis is placed on computer analysis and on deciding which techniques are appropriate for various data sets.
Prerequisite: PSY 270 or permission of instructor

PSY 407 – Psychopathology  3 credit hours
Current theoretical models and research are applied toward understanding the descriptions and causes of the predominant mental disorders. The course is based on the diagnostic system employed by most mental health professionals.
Prerequisite: PSY 203

PSY 408 – Introduction to Clinical Psychology  3 credit hours
The student will be introduced to the various professional activities and settings of clinical psychologists (psychologists trained to independently assess, diagnose, and treat mental disorder). Special emphasis will be given to psychotherapeutic interventions.
Prerequisite: PSY 407 and junior standing

PSY 408F – Intro to Clinical Psy Field Exp  1 credit hour
Students will visit a clinical facility for three hours a week and process their learning experiences in a one hour weekly lab. Opportunities to interact with patients and staff are included. Must be taken concurrently with PSY 408. Permission of instructor required.
Department Consent Required
Prerequisite: PSY 203 and junior standing and permission of instructor. Corequisite: PSY 408.

PSY 412 – Industrial/Organizational Psychology  3 credit hours
A survey of human behavior and psychological principles as they apply to the world of work. Topics of emphasis will include work analysis, personnel recruitment and selection, training, performance management, employee attitudes, work motivation, leadership, and work design
Prerequisite: PSY 203

PSY 415 – Group Dynamics  3 credit hours
Group Dynamics includes the study of group development; structure; influence and interaction and group outcomes. Students will apply material covered to various types of groups such as dyads or couples, teams, collaborative learning groups, juries, cults and crowds.
Prerequisite: PSY 203

PSY 420 – Advanced Research Design and Analysis in Psychology  3 credit hours
Advanced multivariate statistical techniques are explored, including Multiple Regression, Canonical Correlation, MANOVA, Discriminant Function Analysis, and Factor Analysis. Special emphasis is placed on computer analysis and on deciding which techniques are appropriate for various data sets.
Prerequisite: PSY 270 or permission of instructor

PSY 430 – Memory and Cognition  3 credit hours
Topics concerning intellectual functioning are reviewed. Emphasis is placed on the information processing approach to the study of mental life. Topics include perception, attention, consciousness, memory, problem solving, and language. Prior completion of PSY 270 is recommended.
Prerequisite: PSY 203

PSY 435 – Psychology of Humor  3 credit hours
Survey of psychological theories, principles, and facts in areas such as social psychology, personality, psychobiology, development, cognition, industry/organizations, and health as they apply to humor. Specific topics include: why we laugh, how we understand humor, prejudice and humor, multicultural similarities and differences, humor in applied settings (e.g., workplace, education), and humorous media.
Prerequisite: PSY 203 and PSY 270 is recommended.
PSY 440 – Health Psychology  
Examines how thoughts, emotions, behaviors, physiology, and culture influence health and well-being. Topics include: physical systems of the body, stress and illness, health-related behaviors, health services, and end-of-life care.

PSY 450 – Psychological Testing  
This course is designed to teach you about psychological testing. Throughout the semester, you will learn about the basic theory and considerations underlying construction of instruments measuring psychological characteristics. PSY 270 recommended. Prerequisite: PSY 203

PSY 453 – Experimental Child Psychology  
The psychology of child development is studied. Special emphasis is placed on experimental findings related to the development of physical, intellectual and cognitive functioning, and the development of personality. Prior completion of PSY 270 is recommended. Prerequisite: PSY 203 or PSY 230

PSY 455 – Adolescent Psychology  
Adolescent development is comprehensively reviewed. The intellectual, physical, and social/moral development of adolescents is discussed, along with the special problems of young adults. Prerequisite: PSY 203 or PSY 230

PSY 462 – Adult Development and Aging  
The changes in physical, cognitive and social/personality development during adulthood are addressed. Prerequisite: PSY 203 or PSY 230

PSY 465 – Psychopharmacology  
The course consists of an introduction to pharmacology as a science followed by a discussion of therapeutic and recreational psychoactive drugs. Psychoactive drugs are discussed in relation to their effect on behavior and nervous system physiology. Prior completion of PSY 203, background in physiological psychology, or background in biology is recommended. Department Consent Required

PSY 470 – Neuropsychology  
The relationship between human brain function and behavior is investigated. Special emphasis is placed on the behavioral effects of brain injury and methods of neuropsychological assessment. Prerequisite: PSY 313

PSY 475 – Practicum in Psychology  
This course gives the student the opportunity to gain experience in the application of psychological principles in various settings. Department Consent Required Total Credits Allowed: 3.00 Prerequisite: 24 completed hours of Psychology coursework and permission of the department chair

PSY 475G – Practicum in Gerontology  
This course gives the student the opportunity to work with professionals in the field of aging. Includes 120-180 actual contact hours during the practicum experience.

PSY 477 – Psychology and Law  
Within this course, students will learn how psychology has influenced legal processes and outcomes. Topics covered include theories of criminology, factors associated with police questioning, jury selection and deliberation and punishment and sentencing. Students will also study how psychologists ranging from researchers and clinicians to expert witnesses and advocates work within the legal system. Prerequisite: PSY 203
